📍 Pitesti

☎ 0748823593

Profile

Highly motivated, organized, and dedicated QA Tester with 4 years of extensive multi-domain experience. Proficient in diverse testing techniques, with a strong understanding of the full **SDLC**. Applied varied testing methods across multiple projects to deliver **high-quality, reliable software** that meets all business requirements. Recognized for **sharp attention to detail**, proactive defect resolution, **and a passionate commitment to continuous learning and knowledge sharing.**

Experience

Tester, Endava PLC, Pitesti

June 2022 — Present

Project objective: Naval Shipping

Technology Stack: Jira, Confluence, GIT, Rider, AWS, Kibana, TeamCity, Postgres, TestRail

- Conducted **REST API** end-to-end testing with third-party systems, ensuring integration and functionality using **Postman/Insomnia**.
- Led rigorous testing of **payment** flows to guarantee seamless transaction execution with external partners.
- Validated **UI** communication between front-end and back-end systems to ensure seamless data exchange.
- Identified **edge cases** in testing, driving design improvements and additional user stories in collaboration with the **Product Owner**.
- Authored and executed complex **SQL scripts** in JetBrains Rider for precise **PostgreSQL** database testing.
- Managed **AWS S3** buckets for effective file and resource identification.
- Quickly identified issues using **Kibana** for efficient monitoring.
- Became the **QA SME** for the project, providing domain expertise and technical guidance.

Project objective: Payments

Technology Stack: Jira, Confluence, GIT, IntelliJ IDEA, PowerShell, Azure Data Studio, Azure Storage Explorer.

- Authored and maintained **JSON** and **Kubernetes** scripts to streamline data handling and automate testing setups.
- Utilized Azure tools to manage databases and storage effectively.
- Ensured optimal communication and data consistency across multiple **microservices**.
- Managed **Apache Kafka** configurations for efficient message streaming and system integration.
- Presented testing outcomes and new features to stakeholders, enhancing feedback and system development.

Junior Programmer, Vision, Pitesti

November 2021 — May 2022

Code and design new functionalities based on detail specifications of business and user requirements. Used an internal tool to create fully dynamic web pages with custom validations. Helped to automate user experience dealing with counter work process.

Education

Master’s Degree, University of Pitesti , Pitesti

September 2021 — July 2023

Main Courses: Machine Learning, Artificial Intelligence , Cloud Databases.

Grade: GPA 5 (5 scale) / 10 (10 scale)

Bachelor's Degree in Computer Science, University Of Pitești, Pitești

2018 — February 2021

I developed an **online platform** to connect the University of **Pitești** with the socio-economic environment, facilitating student access to internships and potential job opportunities. The user-friendly platform was built using **Laravel (MVC, HTML, CSS, PHP, Bootstrap) and MySQL**, and is actively used by the **University of Pitești**.

Grade: GPA 4.85 (5 scale) / 9.70 (10 scale)

Soft skills

Adaptability, Curiosity, Analytical Thinking, Fast Learner, Team Oriented.

Tech-Skills

- **Manual Testing:** Advanced expertise in manual testing; adept at test case creation, execution, and defect tracking to ensure software quality.
- **Automated Testing:** Intermediate proficiency in automated testing; experienced in using tools like Selenium and Cypress to create and maintain test scripts, improving test efficiency and coverage.
- **Artificial Intelligence:** Context-engineering and prompt design, hands-on with MCP tools, and continuous experimentation with new LLMs (Claude, GPT, etc.)
- **Web Development:** Fundamental knowledge of web development, with practical understanding of HTML, CSS, and JavaScript.
- **Programming:** Proficient in several programming languages including C#; comfortable with basic software development concepts and algorithms.
