

IONUT NICUSOR CIONCU

QA Engineer

✉ cioncu_ionut@yahoo.com ☎ +40748823593 📍 Bucharest 🔗 LinkedIn 🐙 GitHub

Profile

QA Engineer with 4+ years of experience in **Payments** and **Logistics**. Strong in **REST API testing**, **PostgreSQL** validation, and **end-to-end testing** within a microservices architecture. Hands-on with **Playwright**, **Cypress**, and **Selenium**. Applying AI-assisted testing tools to enhance QA workflows.

Education

Master's Degree in Computer Science
University POLITEHNICA of Bucharest

Sep 2021 – Jul 2023 | Pitesti

Main Courses: Machine Learning, Artificial Intelligence, Cloud Databases.
Grade: GPA 5 (5 scale) / 10 (10 scale)

Experience

QA Engineer, Endava PLC

Jun 2022 – Present | Pitesti

Project industry: Maritime Logistics

Technology Stack: .NET, GIT, AWS, Kibana, TeamCity, PostgreSQL, TestRail, Jira, Confluence

- Earned **QA Subject Matter Expert status**, becoming the go-to for domain knowledge, testing approaches, and feature shaping across QA, dev, and client teams.
- Conducted **REST API** end-to-end testing across third-party integrations using **Postman**, covering payment transaction flows from initiation through settlement.
- Identified critical gaps in business flows during testing that reshaped feature design and drove new user stories in direct collaboration with the **Product Owner**.
- Queried **PostgreSQL** databases to confirm data integrity across services, catching discrepancies in records produced by **API** calls, payment transactions, and third-party exchanges before they propagated downstream.
- Performed root cause analysis on production defects by correlating **Kibana** logs, S3 file traces, and **APM** metrics across microservices, monitoring third-party webhook integrations and deploying multiple code versions via **TeamCity** to pinpoint exact failure points.

Project industry: Payments

Technology Stack: Java, Angular, Apache Kafka, PowerShell, Azure DevTools, Kubernetes

- Tested the **data ingestion pipeline**, verifying that merchant transaction data was correctly processed and transformed through each **microservice** consumer using **Azure Data Studio** and **Azure Storage Explorer**.
- Monitored **Apache Kafka** topics to validate message flow between services, ensuring data integrity at each processing stage.
- Queried **Cosmos DB** to verify ingested transaction data and trace records across services.
- Built **PowerShell** functions with parameters to automate repetitive testing workflows and managed **Kubernetes** pods for testing and defect investigation.

Junior, Vision

Nov 2021 – May 2022 | Pitesti

- Developed dynamic web forms with custom field validations and business rules on an internal .NET/Drupal platform, digitizing paper-based workflows for Romanian municipalities.

Personal-Projects

Catchy [🔗](https://getcatchy.dev/), <https://getcatchy.dev/>

- Built and published an open-source Chrome extension using **JavaScript** and **Manifest V3** that intercepts console.error, uncaught exceptions, and unhandled promise rejections, surfacing them as in-page toast notifications without requiring DevTools.
- Designed per-site enable/disable controls, per-error-type color coding, error history drawer, and session/permanent ignore rules — solving a real gap in front-end debugging and **UI testing workflows**.
- Delivered end-to-end via an **AI-assisted development workflow** using Claude and CodeRabbit for automated code review, with a **CI/CD pipeline** executing **Playwright** E2E tests on every commit.

University Internship Platform — Bachelor's Degree Project [🔗](#)

- Built a full-stack web platform using Laravel (PHP, MVC), MySQL, HTML, CSS, and Bootstrap connecting University of Pitești students with internship and job opportunities from the local business environment.
- Implemented user authentication, forum-style posting and interactions, enabling students and companies to engage directly through the platform.
- Designed and managed the MySQL database schema, including migrations and relationships between users, posts, and company listings.

Tech-Skills

Test Automation: Playwright, Cypress, Selenium, Page Object Model (POM), Data-Driven Testing

Programming: C#, JavaScript, TypeScript, HTML, CSS, OOP

CI/CD: GitHub Actions, TeamCity, Kubernetes

SCM: Git, Bitbucket Cloud, Azure DevOps

Cloud: AWS, Azure, Cloudflare

Databases: SQL, PostgreSQL, Cosmos DB

Methodologies: Agile, Scrum, BDD, Shift-Left Testing, Test Case Design

AI-Assisted Testing: AI Test Generation, LLM Testing, Generative AI (GenAI), GitHub Copilot, MCP Tools, Claude, GPT

Soft-Skills

Leadership: Mentorship & Onboarding, Team Leadership

Communication: Stakeholder Communication, Cross-Functional Collaboration

Mindset: Analytical Thinking, Problem-Solving, Attention to Detail, Adaptability
